Working Group Goals

1. Keep all concerned informed of planned operations and interdiction activity and the availability of intelligence resources available for support.

Tasks and Responsibilities

- a. Projection of all planned counter drug operational activity
- b. National and theater resources available for intelligence collection and analytical support

2. Develop an intelligence baseline with a surge capability

Tasks and Responsibilities

- a. Identify overall intelligence objectives and associated targets
- b. Outline collection and operational intelligence strategy for counter drug and interdiction support
- c. Determine type and amount of intelligence resources and activities needed to sustain collection and associated analytical support in baseline and surge modes

3. Enhance the Intelligence capability to influence operational planning and drive associated interdiction operations

Tasks and Responsibilities

- a. Define policy for intelligence sharing and integration of host country involvement in operational intelligence activities supportive of combined counter drug and interdiction operations

- b. Determine methodology for:

- All source target analysis and associated collection support based on host country and U.S. intelligence objectives
- Intelligence analytical support to interdiction and counter drug operational planning
- Timely collection and operational intelligence support to ongoing counter drug and interdiction operations
